

clothing for all children®

flat seaming

on all garments, all over, all the time. Most clothing is made with an overlock seam. Overlock seams are a cheaper, faster and easier way to sew clothes but they leave bulky, itchy, uncomfortable seams in clothing. Flatlock seams leave a smooth surface, giving which gives a seamless feel.

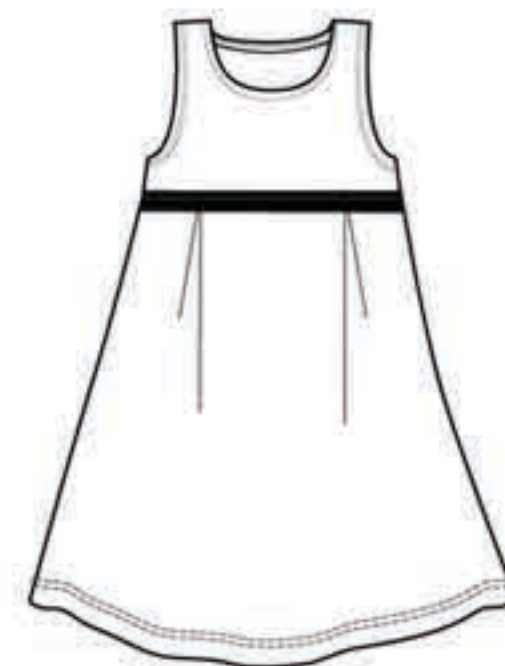

printed details

we know that buttons, zippers, accessories, jewelry and more can be irritating--but they also make clothes look cool. We digitally print or top-stitch details and accessories to ensure both style AND comfort.

printed labels

all of our labels are digitally printed for safety (plastisol free) and a flat, smooth feel.

dressy looks

we offer styles for dressy occasions--but in comfortable fabrics, constructed to feel like a favorite pair of sweats.

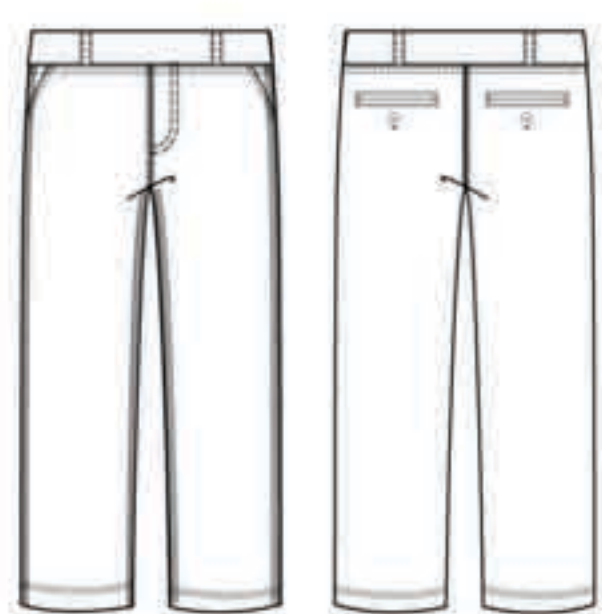

wide collars

our collars are constructed slightly wider than the average tee collar, bound with a flat seam, to prevent discomfort and tugging at the neck.

softest fabrics

we source the softest cotton and sensory blends, then we comb and bio wash all of our fabrics for extra silky softness.

encased elastic

all of our waistbands are encased in soft french terry, flat-locked to the body of the pant--for extra comfort around the sensitive waistline.

printed jersey

we digitally print lace, houndstooth, plaid, and other patterns and fabrics which are usually itchy.

seamless socks

Our hand-linked toe socks have a specially developed seamless toe construction. No bothersome toe seams, no heel pockets.

testing

we fit and test our clothing on kids with hypersensitivity to basic clothing. We base our construction and design on their feedback.
